ACADEMIC PROJECT

Project Name : CARGO SYSTEM.

Project Description: Cargo System is a web based system. This is a marine based system designed to give marine operators access for navigation, maintenance and emergency services via web-based application and the response centers details can be maintained and updated frequently.

Through this system the marine company can communicate with the ship, and will be able to track status and the stability of the ship. There will be a database administrator in the company who will be monitoring the ship details through the system 24 hours. All the data about marine will be maintained in a centralized database.

Another One Project: CRIME MANAGEMENT SYSTEM (online Based).

DECLARATION

I, **THIRUMANIKANDAN.G**, hereby declare that all the information mentioned above is true to the best of my knowledge and belief.
